

# YOUR SITE IS IN OUR SIGHTS

Right from your project's kickoff meeting, you'll see representatives of all of Ayres' disciplines. They've worked together on project after project, so they'll be able to immediately zero in on solutions to your challenges. While other site/structural/survey/MEP teams are still introducing themselves to each other, we're out of the blocks on Day One.

WE WORK WITH

Clients As  
Partners

AYRES

Ayres brings considerable experience in completing multidisciplinary projects. Our team works in a collaborative environment to deliver comprehensive solutions, not piecemeal deliverables. Ayres excels in 3D scanning and Matterport expertise, as well as sustainability. Our six LEED-accredited experts span the civil engineering, landscape architecture, and MEP specializations.

### Truly Multidisciplinary:

Among our current projects, **over 600** involve teams comprising multiple Ayres divisions.

“The Ayres team was critical in the planning, development, and completion of our beautiful school. They invested in not only the product, but also the process of creating this space. It is clear that relationships matter.”

**John Groh**

Principal, Ellsworth Community School District,  
referring to Ellsworth Elementary School Design, Ellsworth, WI
