

ONE SUB, ONE POINT OF CONTACT

You'll find our project lead is very responsive to you and is the primary point of contact for critical communications with our team. Our lead efficiently coordinates with all of our in-house experts. You don't have to wrangle multiple subs. You don't have to deal with a mega engineering firm whose disciplines don't even know each other – or their overseas designers.

WE PROVIDE

Smart,
Creative
Solutions

AYRES

Spend less time playing middleman and more time leading the pack on design. Spend less time sending out multiple RFPs and haggling over countless contracts, and get right to the work you were made for – designing beautiful and functional buildings.

It's not just about timely communication; it's about having meaningful discussions and asking the right questions to save time during design and to avoid costly mistakes down the line. With all parties seeing the big picture and proactively addressing potential issues, such as the placement of systems, setbacks can be prevented for smoother project execution.

"I don't recall ever constructing a \$3 million project on campus without receiving a single complaint from my clientele. That can be attributed to the thorough planning work upfront from Ayres."

Terry Classen

Director of Facilities Management, University of Wisconsin-Eau Claire,
referring to steam loop project replacing piping to and within
campus buildings

Bring All the Experts to the Table:

If your project is complex, put any or all of our experts to work for you:

- Civil Engineers
- Mechanical Engineers
- Electrical Engineers
- Structural Engineers
- Landscape Architects
- Surveyors
- Wetland Delineators
- Traffic Engineers
- Environmental Scientists

One Sub, One
