

ARCHITECTURE SUPPORT SERVICES

Streamline your architectural firm with integrated consulting services that manage projects effectively, navigate regulations, control costs, and support growth. Benefit from unified project oversight, compliance guidance, cost management, and unique design solutions for each project under one roof, simplifying communication and supporting your creative vision. Tailored to your goals, these solutions help you deliver sustainable designs on time and within budget, creating client satisfaction and loyalty.

Design: Each project is unique and deserves its own unique solution. Each system is designed to best fit your project needs – no cookie-cutter designs!

Communication: Strong collaboration is vital to an effective and successful team. Having one consultant and a single point of contact for multiple disciplines, instead of five different consultants, makes communication quick and easy. It's not just about timely communication; it's about having meaningful discussions and asking the right questions to avoid costly mistakes down the line and wasted time during design. With all parties involved in the design process and proactively addressing potential issues, like the placement of systems, setbacks can be prevented for smoother project execution.

Sustainability: Long-term viability is important for projects and the environment. Green design implementation can be an environmental asset for your clients and their bottom line due to efficiency.

Accessibility + Safety: A thoughtful approach is necessary regarding how your clients have access both on foot and in their vehicles to their projects. Connectivity as well as traffic flow is a key element in how your project is designed to address client access to make sure people can easily and safely access the facilities, whether it be via foot traffic, bicycle, bus, or car.

Precision: Meeting codes is a critical component in design and construction. You need to be confident that projects are built and delivered correctly on time and on budget.

Your project needs **leadership, innovation, and partnership** – and we're here for all of it. **Creative solutions, timely communication, and a one-stop-shop** for design innovations will take your project from concept to completion. To meet your needs, we'll leverage our extensive experience across a wide range of services:

- Civil + Municipal Engineering
- Construction Engineering
- Environmental Sustainability
- Geospatial
- Landscape Architecture
- Mechanical, Electrical, Plumbing Engineering
- Planning + Development
- Stormwater Management
- Structural Design, Analysis + Inspection
- Roadway + Traffic Engineering

Interested in talking about your project and how you can get help with making it the best it can be?

We're ready to listen and excited to see how we can help you!
